- Cope/Slot Milling
- Tapping and, Countersinking
- 2" – 24.5" Width
- ¾" – 13.75" Height
- 2" – 12" Angle

Material Availability

The O'Neal name brings substantial buying power to the Pittsburgh steel industry. Located adjacent to our sister company, O'Neal Steel, material availability couldn't be simpler. Wide-Flange and I-Beams for construction, building, component, and other structural manufacturing applications are only steps away from our fabrication hub. Strategically located close to the area's largest steel galvanizers, O'Neal Manufacturing Services is the first choice for companies requiring fabricated components, sub-assemblies, and weldments.

O'Neal Manufacturing Services offers significant capacity and manufacturing redundancy. Our team is experienced in solving unique design-to-manufacturing challenges and will create the most effective solution for your project. Experience outstanding quality, on-time delivery, and significant savings to your supply chain with the capable team at O'Neal Manufacturing Services. Let's Build Things!
